

BLANCAS, JOHN RICHARD

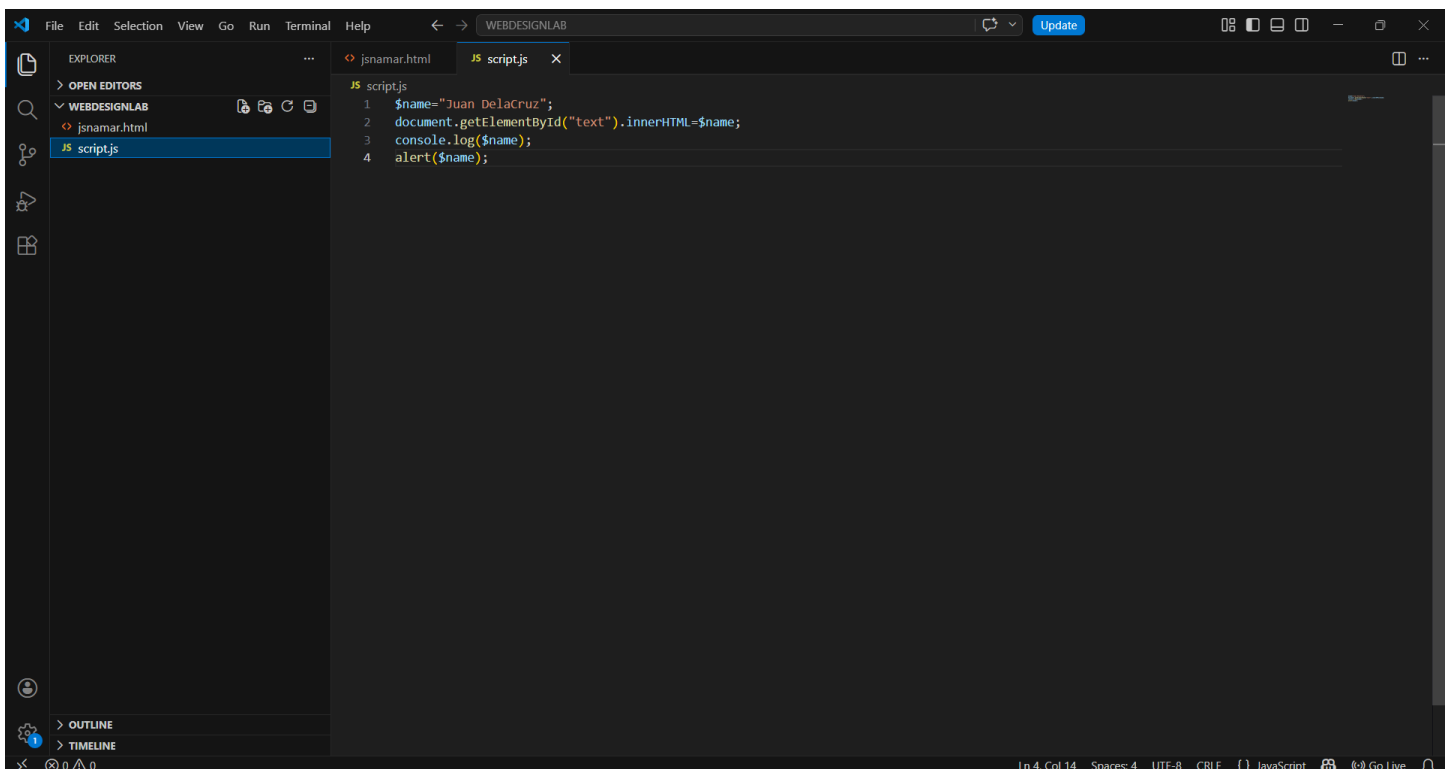

ACTIVITY4

CODE

The screenshot shows the Visual Studio Code editor interface. The Explorer sidebar on the left shows a project named 'WEBDESIGNLAB' with two files: 'jsnamar.html' and 'script.js'. The 'jsnamar.html' file is selected and its content is displayed in the main editor area. The code is an HTML document with a title 'Javascript' and a paragraph with the text 'Juan Delacruz'.

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4   <title>Javascript</title>
5 </head>
6 <body>
7   <p id="text">Juan Delacruz</p>
8 </body>
9 <script src="script.js"></script>
10 </html>
```

The screenshot shows the Visual Studio Code editor interface. The Explorer sidebar on the left shows the same project 'WEBDESIGNLAB' with the same two files. The 'script.js' file is selected and its content is displayed in the main editor area. The code is a JavaScript script that sets a variable 'name' to 'Juan Delacruz', updates the innerHTML of the element with id 'text', logs the name to the console, and shows an alert.

```
1 $name="Juan Delacruz";
2 document.getElementById("text").innerHTML=$name;
3 console.log($name);
4 alert($name);
```

OUTPUT
